Attention: Martin Silver, PE

Re: Georgetown University – MSB Computer Lab

Dear Mr. Silver:

On behalf of The Whiting-Turner Contracting Company, I would like to personally commend yourself and WFT Engineering, Inc. for their outstanding performance and support in the engineering services provided for a difficult fast track project in the New South Building at Georgetown University.

The Whiting-Turner Contracting Company was asked by Georgetown University to provide design/build services to construct a 5000 square-foot computer lab for the business school in the old kitchen/cafeteria area on the ground floor of the existing New South building. W-T was directed to install architectural finishes and a MEP infrastructure for a 55-seat computer lab, tech offices and server room that supports the entire Georgetown University Business School including all its users and resources. WFT Engineering quickly and efficiently responded to a request from WT to provide HVAC design services. WFT had thorough knowledge of the client and full understanding of their requirements including schedule and budget. Through this, WFT displayed value-engineering techniques in addition to a thorough knowledge of equipment availability which was implemented into a comprehensive and complete HVAC design.

In addition to providing WT pre-construction services, WFT provided endless support during construction, project closeout and creation of necessary project completion documents required by Georgetown University. In specific, WFT's mechanical and electrical design groups surveyed the complete construction project and created construction asbuilt drawings that record actual infrastructure installations.

I would highly recommend WFT Engineering to provide professional, efficient and timely management of engineering and design services for any construction project requiring

attention to detail and creative, value engineering solutions.

Please contact me personally if you have any questions regarding the project, details or services provided for the MSB Computer Lab at Georgetown University.

Very truly yours,
THE WHITING-TURNER CONTRACTING COMPANY

Eric Schulz
Project Manager
